

Grainy Film

Use Grainy film to create a look that feels like you are shooting on film. Tap on the card deck icon to choose the grain style and feel you prefer. You can also adjust the grain or style strength by swiping vertically.

Grain- When adding the grain a 0 will make sure that no grain is added.
Style Strength- will adjust the effect on that style

Retrolux

To create a retro image with scratches, light leaks, and film styles use this filter. To add a look, tap on the card deck icon. To select random options with the same style tap on icon. The menu enhancements include: Brightness, saturation, contrast, style strength, scratches, and light leaks.
