
Drama

To create an image that pops from a dramatic look this is the perfect filter. Try this filter to create artistic effects and enhancement. You can tap to choose different filter settings from drama, bright and dark. Then, to adjust the filter strength or saturation slide left or right.

Vintage

If you like the way old photos and videos look from the 50's, 60's, and 70's this is the perfect filter for you. To add a nostalgic feel you can tap on the card deck icon to choose the color settings. Add vignette blur to the image by tapping on the blur on/off button. If the icon has a slash across the icon it means the blur is off. Slide vertically on the image to open the editing options, these include brightness, saturation, style strength, and vignette strength.

Brightness-	Will lighten or darken the image.
Saturation-	Will enhance the vibrance in the image
Style Strength-	Will adjust the effect on that style
Vignette Strength-	Will darken the edges to create a vintage vibe.
