## Auto Adjust

---

To auto adjust an image, begin by tapping on the tune image option. There are many settings in the “tune image” menu. First, we are going to focus on auto adjusting. To auto adjust an image, tap on the magic wand tool on the bottom menu. Once you tap on the magic wand tool, it will adjust the image by increasing or decreasing the brightness, contrast, and shadows instantly. Within a few seconds you’re almost done editing your photo.
