# Tune Image

---

The first step to editing an image in Snapseed is to tune the image. You can enhance the overall appearance and quality of the image. The first icon is a graph looking icon on the lower left side of the image, tap this to show a histogram. The next editing tool is settings which includes adjusting the brightness, contrast, saturation, ambience, highlights, shadows, and warmth. The magic wand tool is auto correction. Lastly, tap the check mark button when you are done editing the image. Here is a detailed explanation about the editing features.
