

15. Use advanced photo filters

There are also 'advanced options' available for filters. Simply click on the filter menu and then click 'advanced options'. You will be able to edit the images 'saturation', 'tint', 'blur' and more.

16. Turn a grid into a solid color

If you want to include a little copy in your grid, you can turn a grid into a solid color by simply clicking on the grid, choosing a solid color and then adding text.
