Review questions

1 How would you use the Essential Sound panel to set an industry-standard audio level for dialogue clips?

2 What's a quick, easy way to remove electrical interference hum from clips?

3 Where can you find the more detailed controls for the options you set using the Essential Sound panel?

4 How can you send a clip to Adobe Audition directly from the Premiere Pro timeline?

Review answers

1 Select the clips you want to adjust. In the Essential Sound panel, choose Dialogue as the audio type. Then, in the Loudness section, click Auto-Match.

2 Use the DeHum option in the Essential Sound panel to remove electrical interference hum. Try the 60Hz or 50Hz option, depending on the origin of your source footage.

3 Most adjustments you make using the Essential Sound panel are applied as effects to clips. You can find the detailed controls by selecting a clip and looking in the Effect Controls panel.

4 It's easy to send a clip to Audition. Right-click the clip and choose Edit Clip In Adobe Audition.
