Auto White Balance

The last step to quickly editing your photos in Snapseed, is to use automatically adjust the white balance. To do this, tap on your tools option and open White Balance. In the menu bar on the bottom, tap on the first option this is called the AW button or auto white balance button. Tap on the AW button to instantly adjust the white blance. Your image may brighten or darken creating a better look. Tap on the check-mark when you are satisfied with your image.
