09. **Upload your own photos**
You can upload your own images by clicking the 'upload' tab and then the big green button 'upload your own images'. Any images that you upload will automatically be saved in your Canva account so you can use them later.

10. Searching for images

You can also search for images inside Canva's library. Conducting a search for a

picture of 'business' will return a collection of business-themed images that you can

drag onto the page and enlarge so it takes up the entire background.
